Laksanamekar, Padalarang, Bandung Barat, 40715.

Profile

I am a Full-stack JavaScript & Golang Developer with experience in building and maintaining scalable web applications using Node.js, Express.js, Go (Golang), React, and Next.js. I have a strong passion for solving problems through clean and efficient code, and I enjoy collaborating with cross-functional teams to deliver impactful digital solutions. With a background in both backend and frontend development, I can adapt to diverse project requirements, ensure high system performance, and stay committed to continuous learning.

Work Experiences

Shoppias Ecommerce LLC

Feb 2026 – Present

Wyoming, USA.

- Developed and maintained mobile applications using React Native (Android & iOS)
- Built and optimized web applications using Next.js
- Designed and implemented scalable RESTful APIs using NestJS
- Integrated third-party services such as authentication, payment gateways, and analytics
- Collaborated with UI/UX designers to deliver functional and clean implementations
- Monitored application performance and resolved bugs and bottlenecks
- Maintained coding standards and participated in code reviews
- Worked closely with product managers and stakeholders to deliver features
- Stayed up to date with modern full stack and mobile development technologies

Project

- **Holistor** – Backend Nest.js & Frontend Next.js

PT.Lincih Cipta Harapan

Nov 2024 – Oct 2025

Bandung, Indonesia.

- Designed and developed server-side architecture for web applications.
- Managed and optimized databases and ensured seamless API integrations.
- Collaborated with frontend teams to deliver a smooth integration between server and user-facing systems.
- Created and maintained technical documentation while ensuring code quality and best practices.
- Implemented automation and testing solutions to improve development efficiency.
- Resolved bugs and technical issues within the backend environment.

Project

- **Orderfaz** – Backend with Go & PostgreSQL.
- **APIbayar** – Backend with Go & MongoDB, Frontend with Next.js for admin & client portal.

**PT.Solusi Eksplorasi Rembulan Utama
(SERU)**

Jun 2023 – Oct 2024

Jakarta, Indonesia.

- Monitoring and managing company applications to ensure smooth operation.
- Handling troubleshooting in case of issues or disruptions, and ensuring the system functions properly according to requirements.
- Identifying, analyzing, and addressing bugs or issues in the database and API code.
- Understanding bug reports from user or customer teams and performing debugging and fixes for these issues.
- Managing and maintaining the company's database, including performing backups and restores, data migrations, and running queries for data analysis.
- Assisting in the creation and maintenance of Application Programming Interface (API).
- Creating technical documentation as maintenance guidelines.

Project

- **BarangKulakan** – Backend Node.js (vendor Garudafood)
- **Web Nusameta** - Backend Node.js (vendor Nusameta)
- **Ultahku** – Frontend Next.js (vendor Garudafood)
- **IA-Skills Exchange** – Fullstack: Backend Express.js + Frontend Next.js (vendor IA-CEPA ECP Katalis)
- **Reksa Mobile Collection** – Backend Node.js (vendor Reksa Finance)

Freelance / Project-based Experience

PT. Maulida Rafa Kurnia (MRK)

Feb 2026 – Feb 2026

Probolinggo, Indonesia.

- Set up and configure WAHA server based on project requirements
- Integrated WAHA with an Express.js backend system
- Developed and managed API endpoints for WhatsApp messaging (text, media, webhook)
- Implemented authentication and API management
- Connected WAHA services with internal company systems
- Prepared technical documentation for system integration
- Monitored system performance and performed troubleshooting when needed
- Optimized service performance and stability
- Provided post-deployment maintenance and bug fixing

Project

- **PDAM Tirta Sembada** – Backend Node.js & WAHA / WhatsApp API

PT. Salmi Murni Berdikari

Nov 2024 – Jul 2025

Bandung, Indonesia.

- Developed backend services with Go (Golang) integrating Meta Ads API.
- Optimized data pipeline using Go + PostgreSQL for real-time reporting.
- Collaborated with marketing team to design data-driven campaign strategies.

Project

- **Melangkah** – Backend GO & PostgreSQL

Education

Rubicamp (Full-stack Javascript Programming
Bootcamp)
Bandung, Indonesia.

Oct 2022 - Feb 2023

SMK Negeri 11 Bandung
Bandung, Indonesia.

Jul 2013 - Jun 2016

Skills & Other Experience

Frontend : React, Next.js, Tailwind, Bootstrap

Backend : Go (Golang), Node.js, Express.js, Feathers.js, Directus, Nest.js

Database : PostgreSQL, SQL Server, MongoDB, Sequelize

Tools & Others : Git, Linux, Docker, Hasura
